SECOND OPPORTUNITY EXAMINATION

Examiner: Ms H.T Nuumbosho (University of Namibia)
Internal Moderator: Ms. L.I Uusiku (University of Namibia)
External Moderator: Professor M. Yazbek (University of Pretoria)

Instruction

1. This question paper consists of 2 pages, including this front page.
2. Assessment on a neonatal resuscitation of a baby who aspirated meconium.
3. To be completed in 15 minutes

Scenario: Mrs. S is 32 years old, gravida 2 para 1 at 39 weeks gestation, is fully dilated and you are attending to her labour. Mrs. S's membranes ruptured two hours ago, and thick meconium-stained liquor is draining. As a midwife specialist, you are assisting Mrs. S to deliver her baby, she gave birth to a baby girl with a birth weight of 2.8kg. The Apgar score is 2/10 at one minute and 3/10 at five minutes, and there is central cyanosis. Demonstrate how you will manage the baby of Mrs S.
